

Date: 16th August 2021

Report on “Software Testing in Industries”

Event Date: **14th August 2021**

Time: **11:30 am to 3:00 pm (3½ Hrs)**

Venue: **Online (Google meet)**

No. of Registered Students: **57 participants**

Resource Person: **Mr.Mohit Sharma(Engineer at Quastech Company).**

A. Details:

As a part of Academic Activity of “ ITSA ” of the INFT Department, the Software Testing in Industries was arranged on 14th August 2021. The Workshop started with the Introduction by Mr. Viral Soni, President of ITSA for the year 2021-22. Our resource person Mr. Mohit Sharma and all other participants were then welcomed for the workshop.

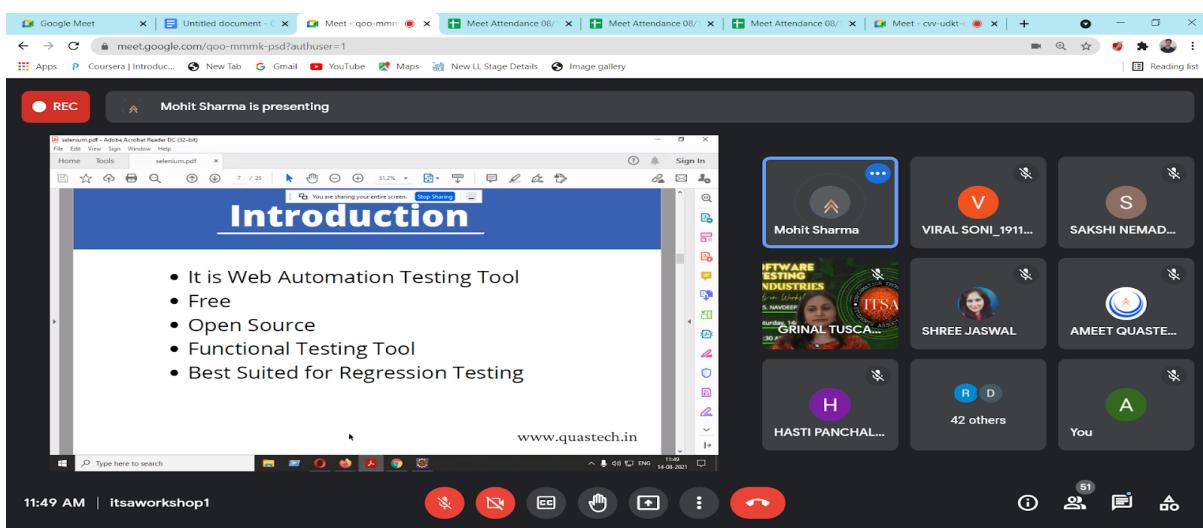

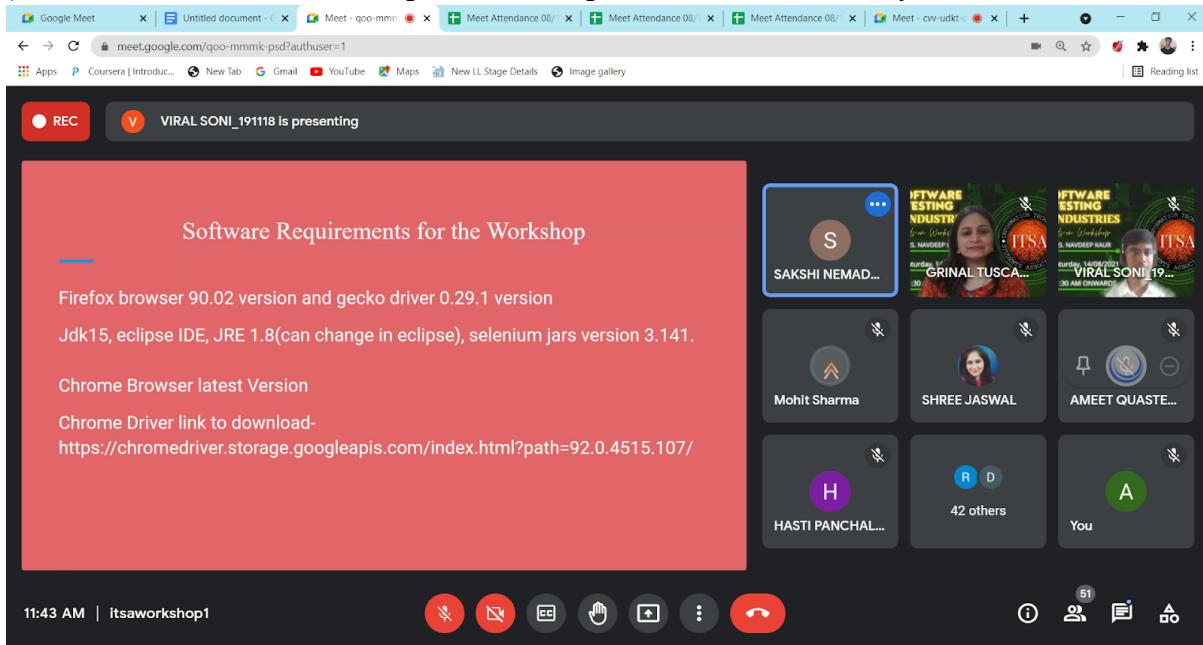

The following topics were covered during the session:

- 1.Difference between automation and manual.
- 2.What is selenium and its usage?
- 3.What are web pages and web elements in selenium?
- 4.How to download selenium jars and drivers?
- 5.How to inspect elements?
- 6.How to handle dropdown buttons and alerts?

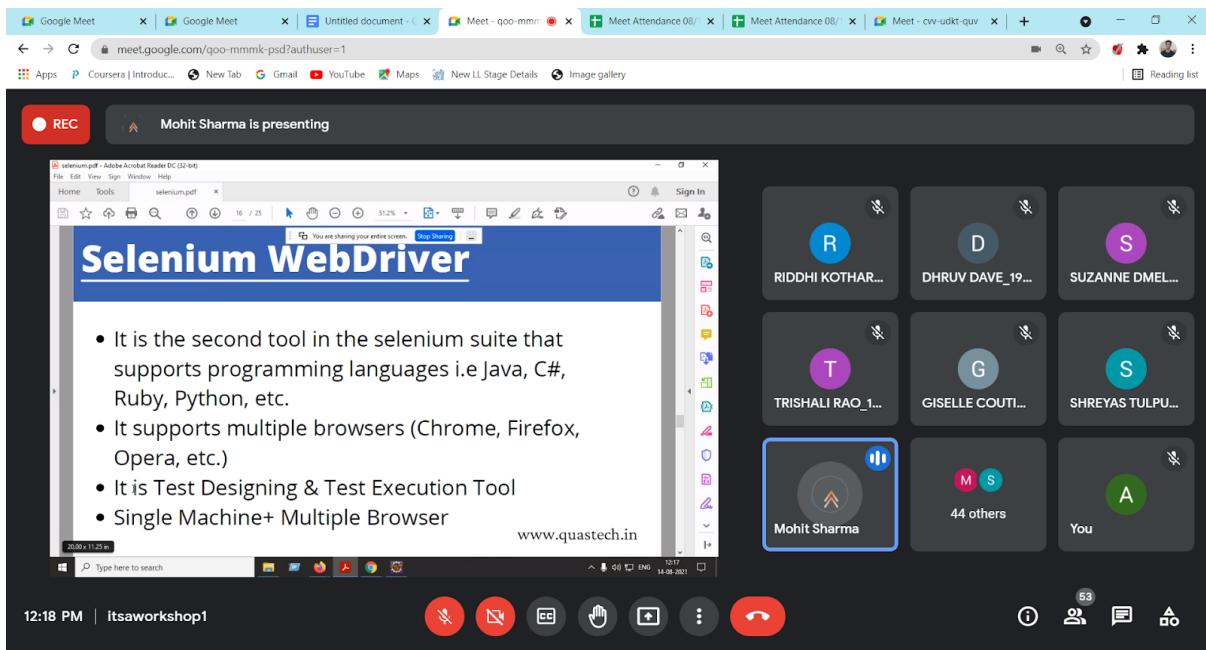

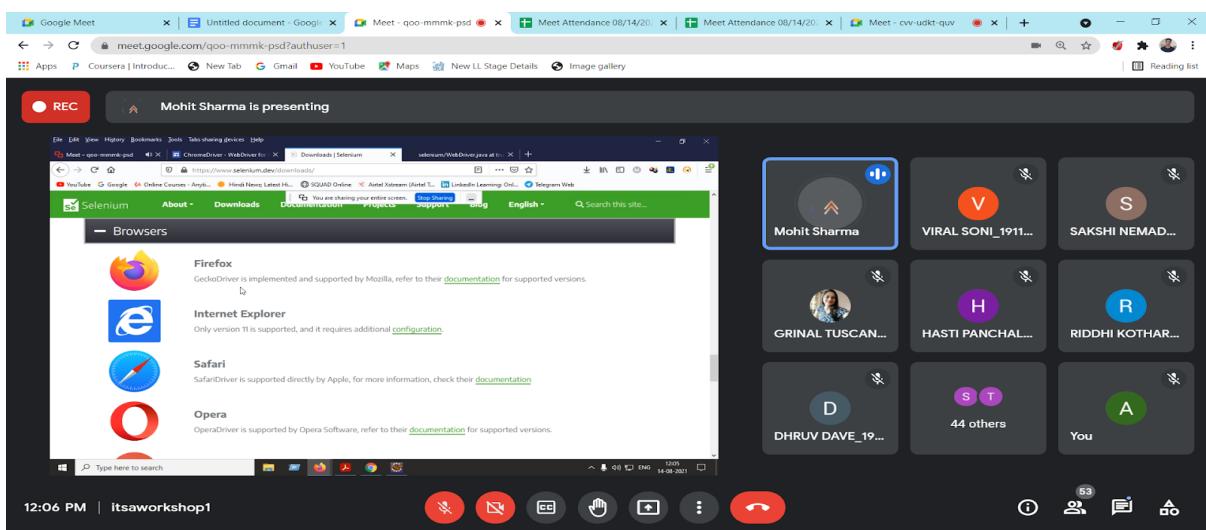

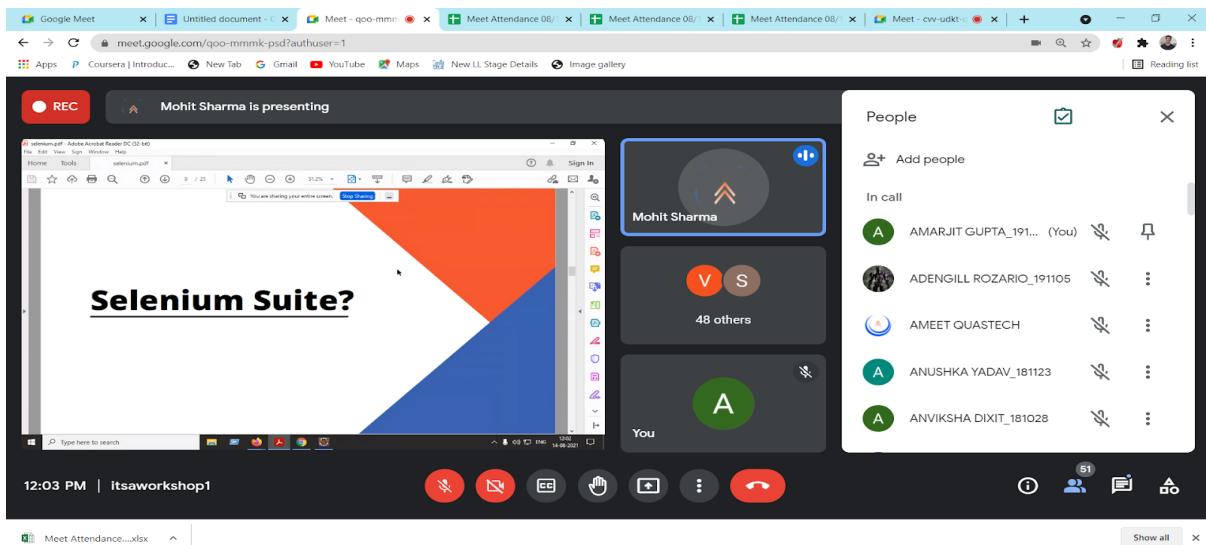

Our resource person Mr. Mohit Sharma is an extremely skilled engineer at Quastech company. The Resource Person delivered an excellent session giving insights into selenium and magnetic automation. This made students interested and motivated to learn more about software testing and using simple programming in day to day life to save time.

B. Images of the Podcast:

i)Introduction of the workshop and screen presentations started by Mr.Mohit Sharma-

ii.Resource person explaining selenium and its usage-

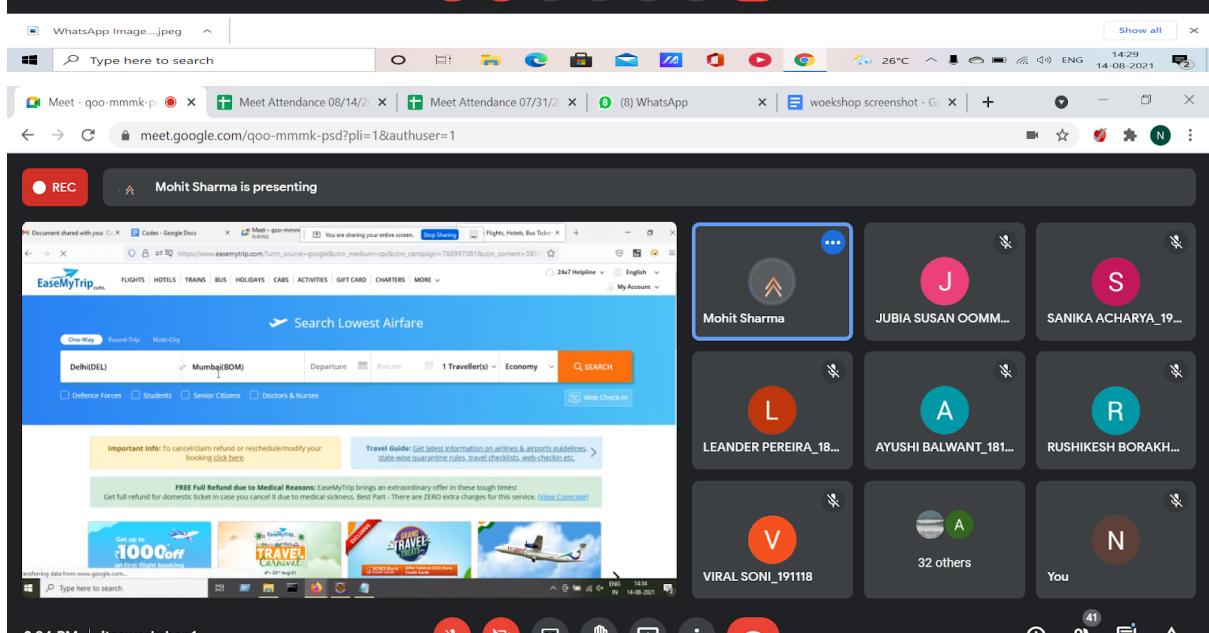

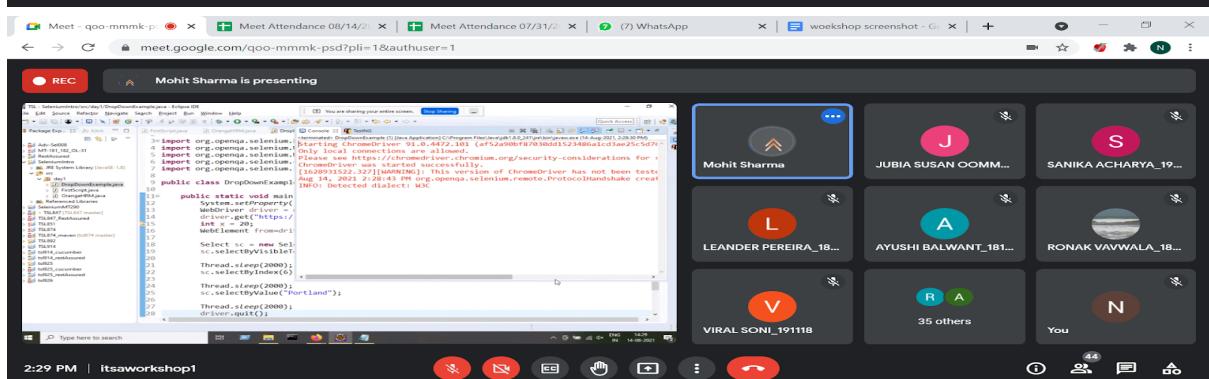

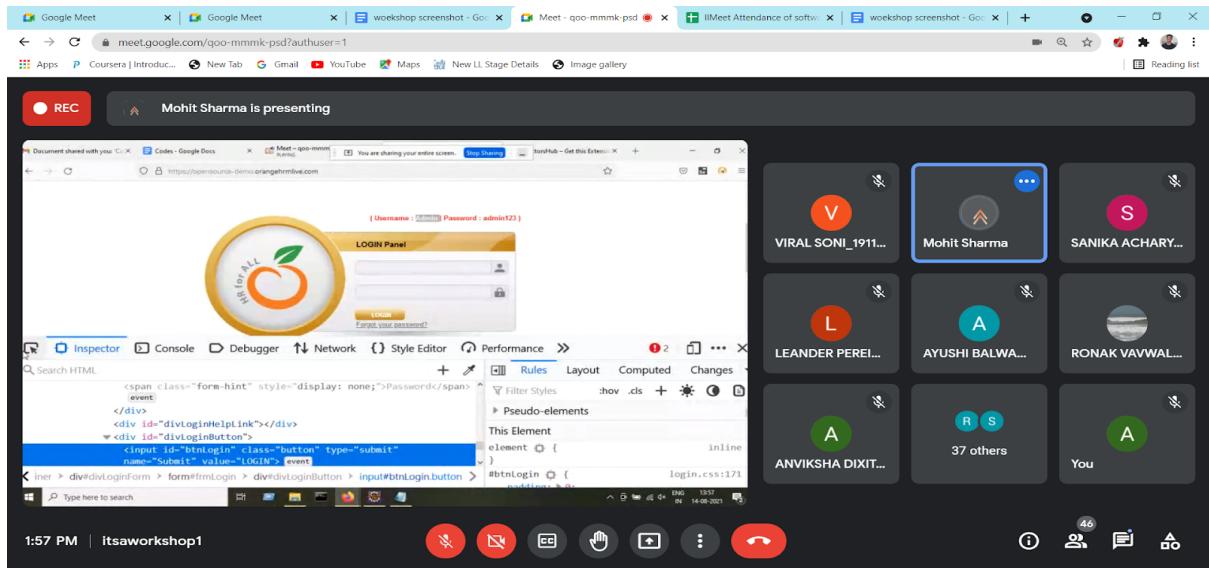

iii.Explanation about Selenium Grid and Selenium Automates Browsers -

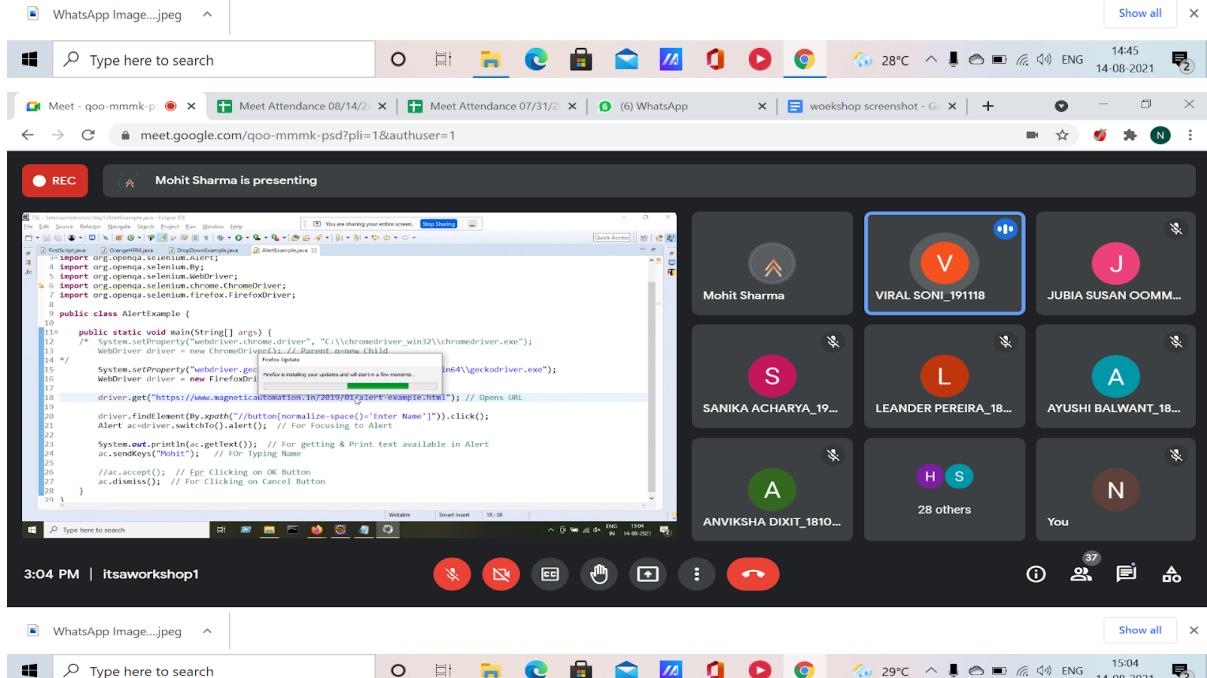

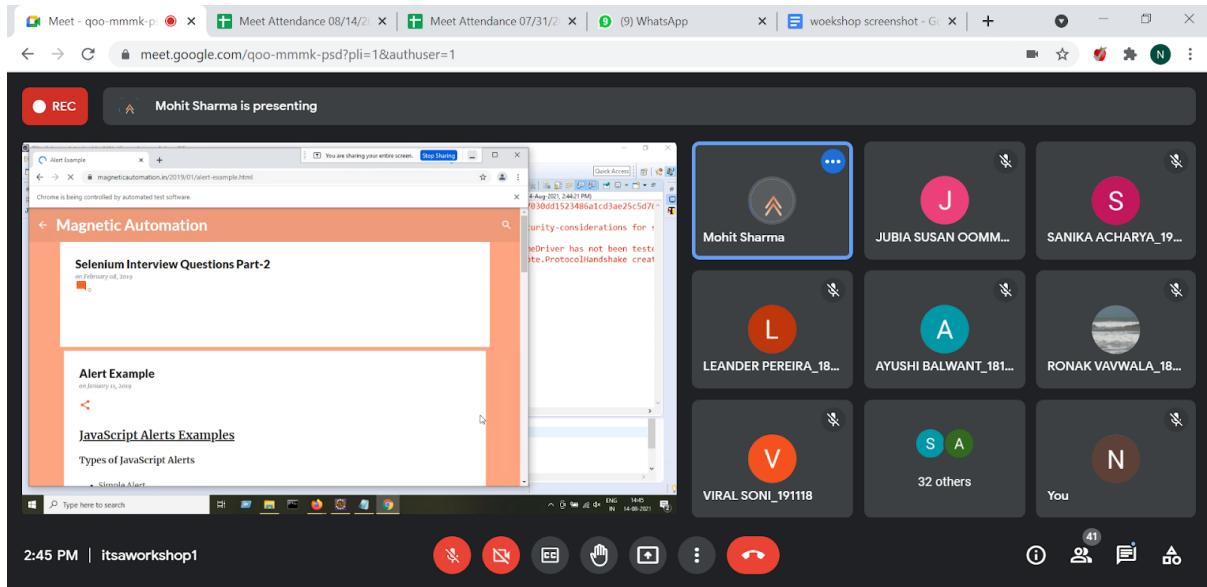

The screenshot shows a Google Meet interface with a presentation sharing session. The presentation slide has a green header: "Selenium automates browsers. That's it! What you do with that power is entirely up to you." Below the slide, a note says: "Primarily it is for automating web applications for testing purposes, but is certainly not limited to just that. Boring web-based administration tasks can (and should) also be automated as well." A "Getting Started" section is visible at the bottom. The Java code editor shows a script named "FirstScript.java" with the following code:

```
package day1;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.chrome.ChromeDriver;
public class Firstscript {
    public static void main(String[] args) throws Exception {
        // Opens Browser
        System.setProperty("webdriver.chrome.driver", "C:\\chromedriver_win32\\chromedriver.exe");
        WebDriver driver=new ChromeDriver(); // Parent pane Child
        driver.get("http://selenium.dev"); // Open URL
        String title=driver.getTitle(); // getting current Page Title
        System.out.println("You are on "+title+" Page");
        Thread.sleep(2000); // Pause Execution for 2 Sec
        driver.quit(); // Closing Browser
    }
}
```

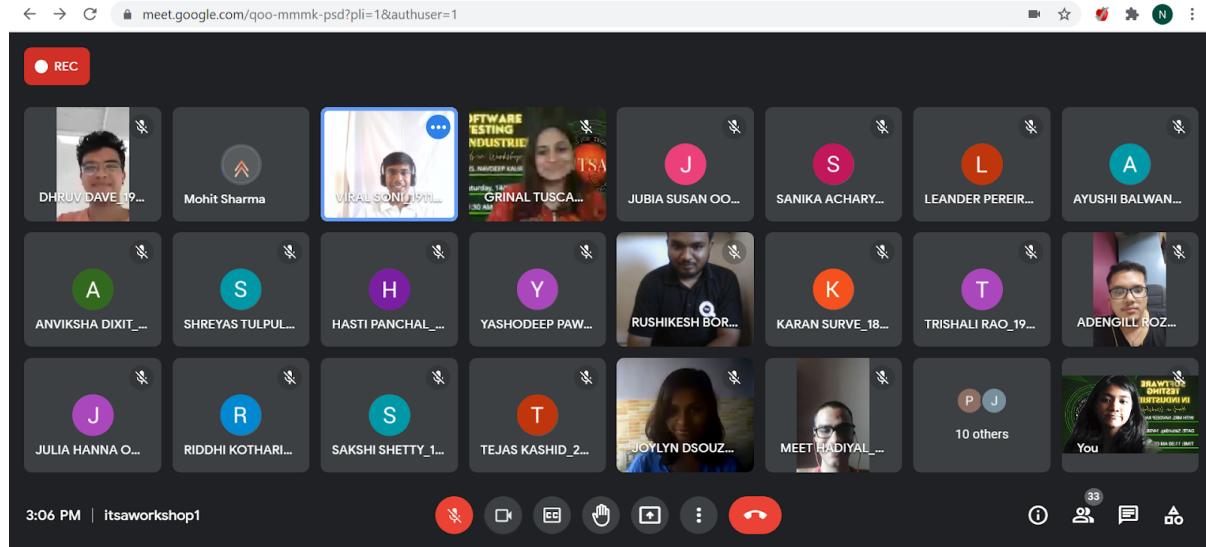

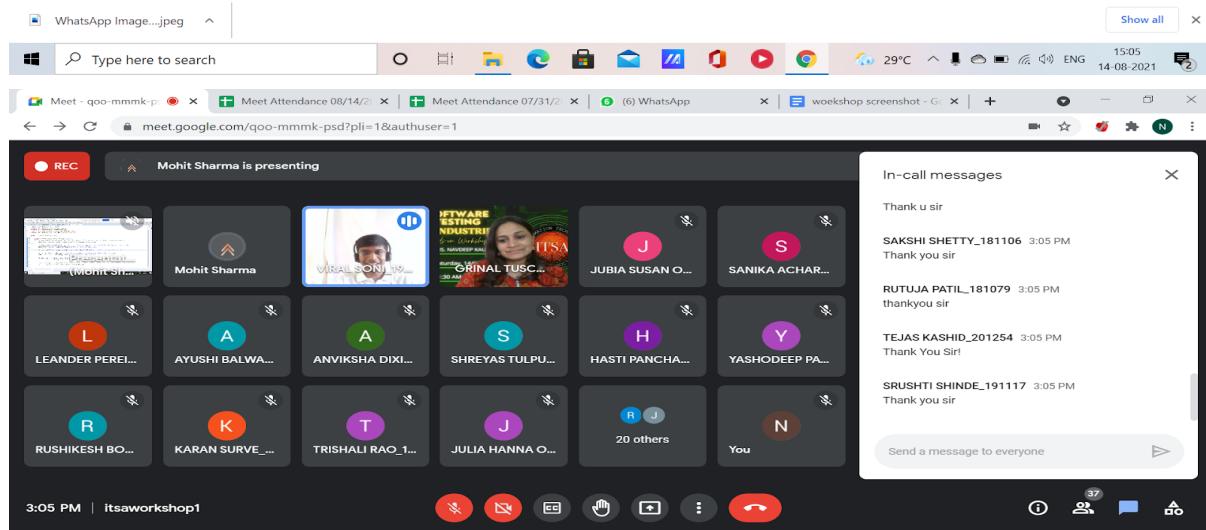

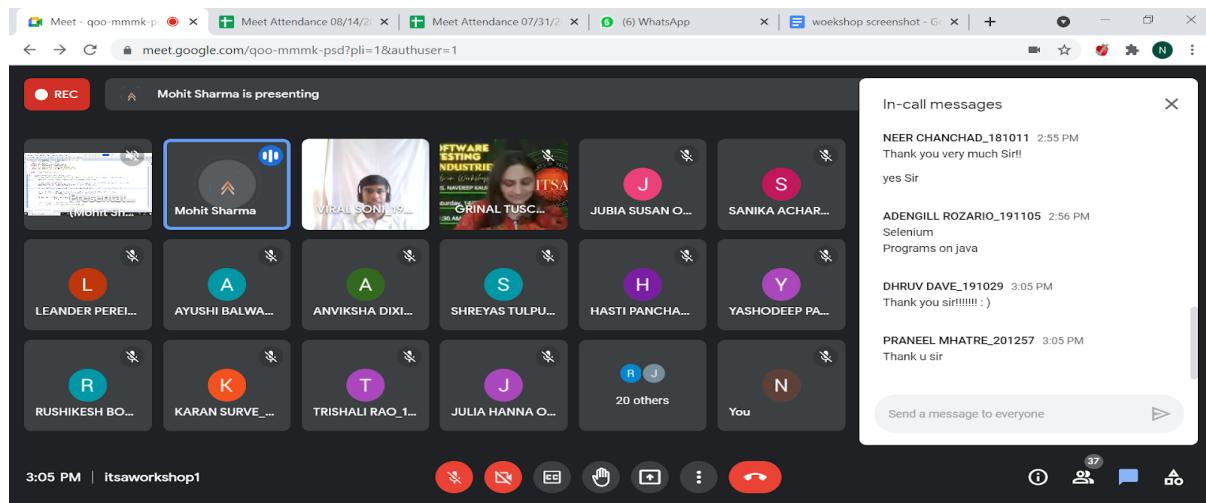

iv.Techiques to make automated login/logout website -

v.Magnetic Automation-

vi. Vote of Thanks-

C. Google Meet Attendance of Students:

D. Workshop Feedback:

The response and feedback from the participants about the Software testing Workshop in industries was very good and as per the feedback, this hands-on workshop was very interactive and highly beneficial to develop automation skills.

Student Feedback:

E. Results/ Impact Analysis:

Quiz Question paper:

Quiz

Description (optional)

1.Which is the most efficient way of identifying an element in selenium? *

ID
 cssSelector
 Name
 Relative Xpath
 Dynamic Xpath

4.In webdriver, which of the following is a valid select statement that selects a value from a drop down element? *

selectByIndex()
 selectByVisibleText()
 selectByValue()
 all of the above

5.Which Component is used to run multiple tests simultaneously in different browsers and platforms? *

Selenium Grid
 Selenium IDE
 Selenium RC
 Selenium Webdriver

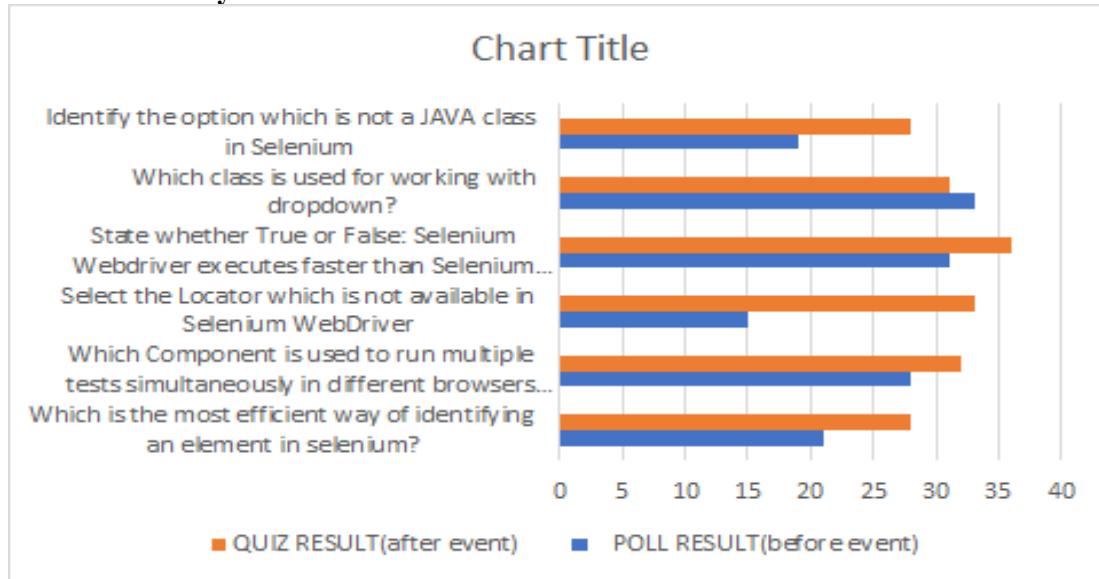

2.In WebDriver, which command can be used to enter values onto text boxes? Select the best answer *

type()
 selenium.type()
 driver.type()
 sendKeys()
 sendKeys("text")

6.Select the Locator which is not available in Selenium WebDriver *

id
 type
 name
 tagname

Result Analysis:

It has been observed that many students could answer a greater number of the questions after attending the workshop which shows that students learned about how to perform automation and also learned how to use selenium.
